

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the hero section's ability to immediately communicate value and guide visitors to a clear next step. Currently, the hero is bleeding value through multiple competing CTAs, vague copy, and a critical rendering issue that shows 'blocked' messages instead of the intended headline, which destroys trust and clarity for first-time visitors.

10	Shipping delay warning buried Shipping delay warning is only in body text, not near price or add-to-cart, creating expectation gap and...	High	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
